

# Abdullah Khrais

Software Engineer

## WORK EXPERIENCE

### Junior Flutter Developer Riada Tech

2022 – Present

- **Tebcan:** Management Doctor App.  
Led the development of a comprehensive management application for healthcare professionals, optimizing appointment scheduling, patient records, and overall practice efficiency.
- **lavara:** uber clone.  
Successfully created a robust ride-sharing application with features similar to Uber, emphasizing smooth navigation, real-time tracking, and secure payment processing.
- **Monasbat:** Reservation of wedding halls.  
Developed a user-friendly platform for reserving wedding halls, streamlining the booking process for both users and venue owners.
- **I Study:** school management system  
Designed and implemented a school management system to enhance administrative processes, grading, and communication between educators, students, and parents.

### Junior Flutter Developer Potato Tech

2021-2022

- **ClickNbook:** Booking app like Airbnb.  
Led the development of a user-friendly app for renting apartments, providing a streamlined experience for property owners and renters.
- **Majarrah:** E-commerce app.  
Contributed to the creation of an efficient e-commerce platform, focusing on user experience, secure transactions, and inventory management.
- **Mazad app** – E-commerce with Auction.  
Designed and implemented an e-commerce app with auction features, enhancing user engagement and providing a unique online shopping experience.
- **Mandob app:** POS System (Point Of Sales).  
Developed a robust Point of Sales system for efficient and seamless transactions in various business environments.
- **Click Shop:** E-commerce app.  
Played a key role in the development of an e-commerce app, emphasizing a user-friendly interface, secure payment processing, and personalized shopping experiences.

## SKILLS

### Hard Skills:

- Computer Programming
- State Management
- API integration
- Database
- Testing
- Third-party Libraries
- IDE
- Firebase
- Mobile App architecture
- Unit Testing
- Version control

### Techniques:

- Mobile Development
- Extension VScode Development
- Software Development Life Cycle
- Android deploy
- IOS deploy

### Tools and Software:

- Flutter
- Dart
- TypeScript

### Languages:

- English (Arabic)
- English (Conversational)

## EDUCATION

Alhussain bin Talal university  
Jordan  
Bachelor software  
Engineering 10/2017 -  
02/2021

## OTHER

- Certified Software Engineer
- Flutter certification
- SQL certification

## FREELANCER

- **CVS:** Successfully developed the CVS application, an American platform designed for selling scrap. The app facilitates a seamless and efficient process for individuals and businesses to manage and sell scrap materials.
- **leadis in:** Spearheaded the creation of Leadis In, a marketing application focused on streamlining marketing strategies and optimizing lead generation. The app provides a user-friendly interface for marketing professionals to enhance their campaigns.
- **Madarscom:** Contributed to the development of Madarscom, a platform connecting schools with qualified educators. The app serves as an efficient solution for teacher recruitment, enabling schools to find the right candidates for their educational needs.
- **Ingot brokers agent:** I obtained an agency from a trading company where I was responsible for attracting clients to the trading platform, Ingot, in exchange for commissions.
